

Explore the Invisible Universe *With Us.*

Research

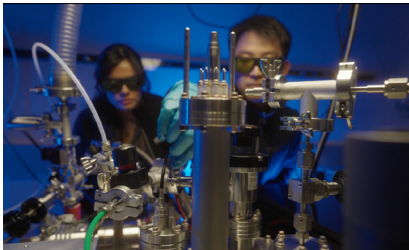

- Conduct precision studies of neutrinos
- Search for dark matter
- Investigate the building blocks of matter
- Explore quantum science
- Observe the early universe
- Develop and use advanced instrumentation and technologies for discovery

Community

- Network with the national and international nuclear physics community
- Immerse yourself in the Wright Lab and Yale research communities
- Access avenues of academic, mental, administrative, and technical support

Mentoring

- Develop skills to be leaders in your field with the expert guidance and mentoring of leading Yale researchers
- Mentor undergraduates
- Participate in training workshops and professional development opportunities
- Engage in outreach with local schools
